

Posters provide a vital part of your Scientific Sessions 2016 educational experience. We've made your learning more convenient by integrating the posters throughout the Science & Technology Hall. To narrow your search of the more than 3,375 posters, we also have organized the posters into six poster sections — Clinical (two sections), Population, Basic & Late-Breaking Basic Science, Best of Specialty and Special Focus — and positioned these sections by exhibitors that offer related products and services.

Here are three other ways to check out the cutting-edge research of the posters:

- 1 View the posters electronically on personal workstations found at the front of the Science & Technology Hall or on your mobile device.
- 2 Network with “Poster Professors,” who are top researchers in their respective fields of interests, as they make their rounds and interact with poster presenters about their research.
- 3 From 10:45 a.m. to noon Nov. 14, meet with poster presenters who represent the top abstracts from each specialty conference during the Best of AHA Specialty Conferences Poster Session.
