This event is not part of the official Scientific Sessions 2017 as planned by the AHA committee on Scientific Sessions Program.

Posters provide a vital part of your Scientific Sessions 2017 educational experience.

We've made your learning more convenient by integrating the posters throughout the Science & Technology Hall. To narrow your search of the more than 3,000 posters, we also have organized the posters into six poster sections — Clinical (three sections), Population, Basic & Late-Breaking, Best of Specialty — and positioned these sections adjacent to exhibitors that offer related products and services.

Here are three other ways to check out the cutting-edge research of the posters:

1. View the posters electronically on personal workstations found at the front of the Science & Technology Hall or on your mobile device.

2. Network with “Poster Professors,” who are top researchers in their respective fields of interests, as they make their rounds and interact with poster presenters about their research.

3. From 10:30 a.m. to 11:45 a.m. on Monday, Nov. 13, meet with poster presenters who represent the top abstracts from each specialty conference during the Best of AHA Specialty Conferences Poster Session.
