This symposium—which presents the unique perspectives of a cardiologist, an endocrinologist, and a primary care physician—offers practical, evidence-based guidance on the use of sodium glucose cotransporter 2 (SGLT2) inhibitors in patients with type 2 diabetes mellitus (T2DM), cardiovascular disease, and renal impairment. Using a unique, interactive format combining expert presentations, live patient-clinician interactions, and audience question segments, participants will learn how to apply clinical guidelines, recent evidence, and shared decision making for optimal use of SGLT2 inhibitors in practice.
