3. Click the blue New video button at the top right of the screen then click “Upload.” Once you click the upload link, you will be taken to the upload page.

Video Privacy

To ensure your videos are viewable by attendees, it’s important to make sure your video privacy settings are set to public.

If you’re hosting your video on YouTube, make sure your video is set to either Public or Unlisted. You can choose this setting as you are uploading your video, or you can change it in the settings of your existing published video.

Public videos can be seen and shared by anyone. They are posted on your channel when you upload them and show up in search results and related video lists.

Unlisted videos can be seen and shared by anyone with the link. Your unlisted videos won’t appear to others who visit the “Videos” tab of your channel page. They won’t show up in Youtube’s search results unless someone adds your unlisted video to a public playlist. You can share an unlisted video’s URL with other people. The people you share the video with don’t need a Google Account to see the video. Anyone with the link can also re-share it.

If you’re hosting your video on Vimeo, make sure your video is set to Anyone Can See This Video. You can choose this setting either as you are uploading your video, or you can change it in the settings of your existing published video.

Videos with privacy settings set to Anyone can be seen by anyone and embed privacy set to Anywhere means that anyone can embed your video on an external website.

Please note, If you have a higher tier paid subscription to Vimeo (Pro, Business, or Premium) you’ll have a few more options to choose from:

Only people with the private link is a semi-private setting that will make your individual video visible only to people who have the link. Your video’s credits will be removed, and the video will be removed from any channels or groups. Please note that anyone with access to this link can share it with anyone else.

Hide this video from Vimeo.com will make the video unable to be accessed on the Vimeo website (unless you are logged in as yourself), but it still can be embedded on other websites.
