# The Critical Role of Aldosterone in Heart Failure Development and Progression: HFpEF and HFrEF Management

Saturday, November 8, 2025 • Ernest N. Morial Convention Center Learning Studio 4 • 12:30 PM–1:15 PM

The program will explore the evolving understanding of the role of aldosterone in cardiovascular health. It will also examine aldosterone's impact across heart failure (HF) and associated renal disease. Through a review of diagnosis and treatment guidelines as well as patient case studies, speakers will discuss current approaches to diagnosing and managing patients with HF, including patients with preserved ejection fraction (HFpEF) and chronic kidney disease (CKD).
